

Renpei Nagashima, Ph.D.

President, Reverse Proteomics Research Institute Company, Ltd.

“Eighteen Months of Reverse Proteomics Research Institute (REPRORI)”

About eighteen months will have passed in September 2003 since REPRORI was founded occupying, by rent, the fourth floor of Kazusa DNA Research Institute (Kisarazu). In the range I am allowed to disclose, I would like to talk about (1) the originally set goals and thoughts and (2) what will have been discovered in those 18 months. There have been unexpected discoveries by now (April).
